Project Name: Product Releasing Data 2018H2

Microsoft -

2007 to 2007

Testing of data is done by manually and customizing tools developed in Shell/Perl scripting.
We modify the Shell scripts as per requirements & to test the Drawing & Image with
modified scripts. The product is in Geographic data files (GDF) format this guides to the customer
when the customer needs data up to a certain level.
My Role:
• Performed Black Box, Functional, Integration and Regression Testing of application.
• Involved in creation and execution of test cases.
• Reporting of bugs.
Tools:
Perl Scripts, Shell Scripts, Sql query, PL-SQL and in-house tools on Unix Sun Solaris
